Executive Summary

- Al Saraf Group Oil Field Services develops and delivers strategic energy infrastructure across the Middle East, specializing in crude oil storage terminals, pipelines, refineries, chemical plants and EPC support for government and private sector clients.

The company combines regional commercial reach with practical project execution experience, procurement capability and group management exposure to oil and gas, chemical, industrial and infrastructure projects.

This profile presents Al Saraf Group Oil Field Service's capability framework and selected project references delivered through the group, management and affiliated project teams across Iraq, Afghanistan, Jordan and regional industrial markets.

- **Energy Infrastructure**
Oil storage, tank farms, pipelines, refineries and process facilities.

- **Chemical Industry**
Sodium hypochlorite, chlorine derivatives and chemical production facilities

- **EPC Support**
Engineering, procurement, construction support, owner's engineering and project development.

Why Alsaraf Group Oil Field Services

- **A focused platform for energy and industrial infrastructure development.**

Proven Energy Experience

- Selected references in tank farms, petroleum processing, pipelines, power support facilities and chemical plants.

Regional Execution

- Project exposure across Iraq, Afghanistan, Jordan and regional markets, with practical understanding of complex operating environments.

EPC Support

- Ability to support engineering, procurement, construction coordination, documentation, testing and project handover requirements.

Commercial Flexibility

- Capability to structure opportunities around trading, storage, rehabilitation, project development and partnership models.

Strategic Partnerships

- Positioned to work with government entities, owners, EPC contractors, operators, financiers and international suppliers.

Services

● Core services offered through Al Saraf Group Oil Field Services

● **Engineering**
Conceptual review, technical coordination, drawings, specifications and project documentation.

● **Procurement**
Equipment sourcing, vendor coordination, bid support, logistics and documentation follow-up.

● **Construction Support**
Site execution support, subcontractor coordination, supervision and handover assistance.

● **Storage Development**
Tank farms, fuel oil, crude oil and industrial liquid storage development.

● **Pipeline Development**
Transfer systems, pumping, metering, piping networks and related infrastructure.

● **Chemical Plants**
Chlor-alkali, sodium hypochlorite, chlorine derivatives and industrial chemical plants.

● **Project Management**
Planning, cost control, reporting, coordination and execution follow-up.

● **Feasibility Studies**
Technical and commercial pre-feasibility, market assessment and investment concepts.

● **Business Development**
Opportunity origination, partner search, contract structuring and client coordination.

Current Business Capabilities

What Al Saraf Group Oil Field Services can support today

Tank Farm Development
concepts, storage strategy and project Concept development, rehabilitation coordination.

Refinery Development
processing project development Small refinery, bitumen and petroleum support.

Pipeline Projects
Metering systems from concept to Pipeline, pumping, transfer and execution support.

Chlor-Alkali Plants
Derivatives and caustic soda industrial Sodium hypochlorite, chlorine opportunities.

Tank Farm Development
concepts, storage strategy and project Concept development, rehabilitation coordination.

Refinery Development
processing project development Small refinery, bitumen and petroleum support.

Pipeline Projects
Metering systems from concept to Pipeline, pumping, transfer and execution support.

Chlor-Alkali Plants
Derivatives and caustic soda industrial Sodium hypochlorite, chlorine opportunities.

Strategic Focus Areas

- **Al Saraf Group Oil Field Services is positioned as a focused energy and industrial infrastructure platform, rather than a general contracting profile.**
- **Oil & Gas Infrastructure**
Crude oil, fuel oil, gas and strategic petroleum infrastructure.
- **Tank Farms & Storage**
Bulk storage terminals, tank farms and industrial liquid storage.
- **Refineries & Process Plants**
Small refineries, bitumen plants and petroleum processing facilities.
- **Chemical & Chlorine Plants**
Sodium hypochlorite, chlorine derivatives and chemical production.
- **Pipelines & Transfer Systems**
Piping networks, pumping, metering and transfer infrastructure
- **Procurement & EPC Support**
Equipment sourcing, delivery support, documentation and EPC coordination

Mission, Vision & Values

Mission

- To develop, support and deliver strategic energy, chemical, storage and infrastructure projects with practical execution capability and commercial discipline

Vision

- To become a trusted regional platform for oil and gas infrastructure, tank farms, pipelines, refineries and chemical industrial development.

Values

- Safety - Quality - Integrity - Delivery - Practical commercial execution
Long-term partnership.

HSE / QA-QC Framework

- Oil, gas and chemical projects require disciplined safety, quality, environmental and documentation controls. Al Saraf Group Oil Field Services presents the following framework as part of its project delivery approach.

Health & Safety

- Project-specific safety planning, site risk assessment, toolbox practices and safe work procedures.

Quality Control

- Inspection, testing, documentation, material verification and handover records.

Environmental Compliance

- Waste handling, spill control, emissions awareness and compliance with project requirements.

Testing & Commissioning

- Pre-commissioning, commissioning support and operational readiness coordination.

Project Documentation

- Submittals, method statements, drawings, quality records and completion dossiers.

Training & Technical Support

- Operator orientation, supplier coordination and technical support during handover.

Clients & Key Reference

● Grouped portfolio reference names by sector.

Full legacy project portfolio remains included in the following detailed pages.

The register above prioritizes energy, storage, refinery, chlorine/chemical and strategic infrastructure experience.

AL SARAF GROUP OIL FIELD SERVICES

DETAILED PROJECT RECORDS

The following pages include selected detailed project records, contract information and scope summaries for the full project portfolio.

Detailed Project Experience

AMG Petroleum Oxidized Bitumen Factory

Featured Refinery / Petroleum Processing Project

- EPC Turnkey Project
- Refinery process unit
- Tank farm facilities
- Industrial operation

Location
Al Anbar
Iraq

Tank Farm
97,000 m³
Nominal
Capacity

Facilities
Vacuum unit
& Petroleum
Processing

Designed Capacity
10,000 barrels/day

Scope / Description

Al Saraf Group Oil Field Services role covered design, procurement and supply, construction, commissioning and operational start-up support. The project comprises an advanced oxidized bitumen and petroleum processing facility in Anbar, including double train vacuum residue processing, oxidized bitumen production, heavy vacuum gas oil, light vacuum gas oil and associated tank farm facilities. It is presented as the second largest refinery /processing plant

Al Ghanem Chemical Industries Plant

Featured Chemical & Industrial Project Highlight

- EPC Turnkey Project
- Chemical process systems
- Automation & control rooms
- Integrated production infrastructure

Location
Al Anbar
Iraq

Tank Farm
97,000 m³
Nominal
Capacity

Facilities
Vacuum unit
& Petroleum
Processing

Designed Capacity
10,000 barrels/day

Scope / Description

Al Saraf Group Oil Field Services role covered design, procurement and supply, construction, commissioning and operational start-up support. Al Ghanem Industrial Plant is positioned as the latest facility of its type in Iraq, producing high-quality Sodium Hypochlorite, Liquid Chlorine, HCL and Caustic Soda for industrial and water treatment applications, supported by advanced process systems, automated control rooms, industrial storage and integrated production infrastructure.

AKKAS Gas Turbine Power Project (2x125MW)

Featured Power Generation & Infrastructure Project

- Power Generation
- Water Storage
- Civil Works
- Site Infrastructure

Location
AKKAS
Al Anbar
Iraq

Key Scope
Power Generation
Civil Works

Project Category
Power Plant
Infrastructure

Client / Owner
LANCO

Scope / Description

Construction of a gas turbine power station and site infrastructure, including generator foundations, water storage tanks, control room, accommodation block, offices and dining facilities, perimeter security wall, site clearing and leveling works

Fao Crude Oil Tank Farm Project

Featured Crude Oil Storage & Export Infrastructure Project

- Crude oil storage
- Firefighting systems
- Pipeline networks
- Cathodic protection

Location Fao Oil Depot Iraq		Capacity 8 tanks x 58,000 m ³
	Project Owner Basra Oil Company	

Partner
Ibn Majid General Company

Scope / Description

ICTSAD role covered design, procurement and supply, construction, commissioning and operational start-up support. The project comprises an advanced oxidized bitumen and petroleum processing facility in Anbar, including double train vacuum residue processing, oxidized bitumen production, heavy vacuum gas oil, light vacuum gas oil and associated tank farm facilities. It is presented as the second largest refinery /processing plant of its type in Iraq within the group and management project experience portfolio

Well Drilling and Permanent Potable Water Supply

Water Infrastructure & Utility Support Project

- Water wells
- Pumping systems
- RO treatment
- Utility support

Location
Al Rumadi
Iraq

Key Scope
Water wells
RO treatment

Project Category
Water Supply
Treatment

Client / Owner
Iraqi MOD

Scope / Description

Geotechnical survey, drilling and completion of potable water wells, installation of steel well lining, pumps and pipework, and processing through reverse osmosis treatment systems to support permanent water supply requirements.

MTC Compound Construction

Military Training Centre Facilities Project

- Compound works
- Site facilities
- Concrete structures
- Procurement

Location
Baghdad
Iraq

Key Scope
Compound works
Concrete structures

Project Category
Compound
Construction

Client / Owner
USACE

Scope / Description

Construction of reinforced concrete facilities for housing, offices, dining and medical support for an Iraqi Army training centre, including structural systems, roofing, procurement and site implementation.

Camp Hadrian

Camp Infrastructure & K-Span Buildings Project

Page 19

- K-Span buildings
- Turnkey works
- Camp facilities
- Remote execution

Location
Camp Hadrian
Uruzgan
Afghanistan

Key Scope
K-Span buildings
Camp facilities

Project Category
Camp facilities
K-Span

Client / Owner
Tetra Tech

Scope / Description

Construction of reinforced concrete K-Span buildings for personnel use including dining, medical, housing and office facilities, delivered as an isolated-location turnkey camp project.

Camp Gereshk

Remote Camp Construction Project

- Camp construction
- Power generation
- Utilities
- Security works

Location
Camp Gereshk
Afghanistan

Key Scope
Camp construction
Utilities

Project Category
Camp facilities

Client / Owner
MEC

Scope / Description

Construction of a camp including offices, latrines, dining facilities, infrastructure roads, drainage, lagoons, pump stations, power generation, perimeter walls and entry control point security.

LOGCAP IV LSA, Expansion Camp Dwyer

Logistics Support Area Expansion Project

- LSA expansion
- Site grading
- Maintenance shelter
- Logistics support

Location
Camp Dwyer,
Helmand,
Afghanistan

Key Scope
LSA expansion
Maintenance
shelter

Project Category
Logistics Support
Facilities

Client / Owner
RCC Dwyer

Scope / Description

Erection of maintenance shelter and associated camp expansion works, including grading, support areas, utility provisions and functional site infrastructure for logistics operations.

Security Perimeter Fence and Guard Towers DELARAM

Security Infrastructure & Perimeter Protection Project

- Perimeter security
- Fencing
- Guard towers
- Access control

Location
Camp Delaram,
Helmand
Afghanistan

Key Scope
Perimeter
security
Guard towers

Project Category
Security
infrastructure

Client / Owner
RCC Leatherneck

Scope / Description

Supply and installation of perimeter fencing and razor wire protection, including HESCO fortification and perimeter guard towers with sniper screening and access-control support.

Infrastructure Improvements - Command Base Locations

Base Infrastructure Improvement Project

- Infrastructure works
- Workshops
- Roads
- Storage facilities

Location
Al Anbar
Iraq

Key Scope
Infrastructure
works
Roads

Project Category
Base
Infrastructure

Client / Owner
USACE

Scope / Description

Refurbishment of multiple base locations including design and construction of water improvements, access roads, workshops, storage and infrastructure support facilities across command sites..

Supply and Install SHASTA Tents for RCC Leatherneck

Temporary Facilities & Shelter Installation Project

- Tent facilities
- Electrical works
- Mechanical fit-out
- Accommodation support

Location
Camp Shorabak,
Helmand
Afghanistan

Key Scope
Tent facilities
Mechanical fit-out

Project Category
Shelter
Facilities

Client / Owner
RCC Leatherneck

Scope / Description

Supply and installation of SHASTA style tents including flooring, electrical and mechanical fit-out, heating/cooling and interconnection systems to support accommodation and operational use.

Afghan National Army (ANA) Air Corps Phase II

Air Corps Warehouse & Maintenance Facilities Project

- Warehouse facilities
- Engineering support
- Maintenance buildings
- Military infrastructure

Location
Kandahar
Air Base
Afghanistan

Key Scope
Warehouse
Facilities
Maintenance
Buildings

Project Category
Military
Facilities

Client / Owner
AFCEE

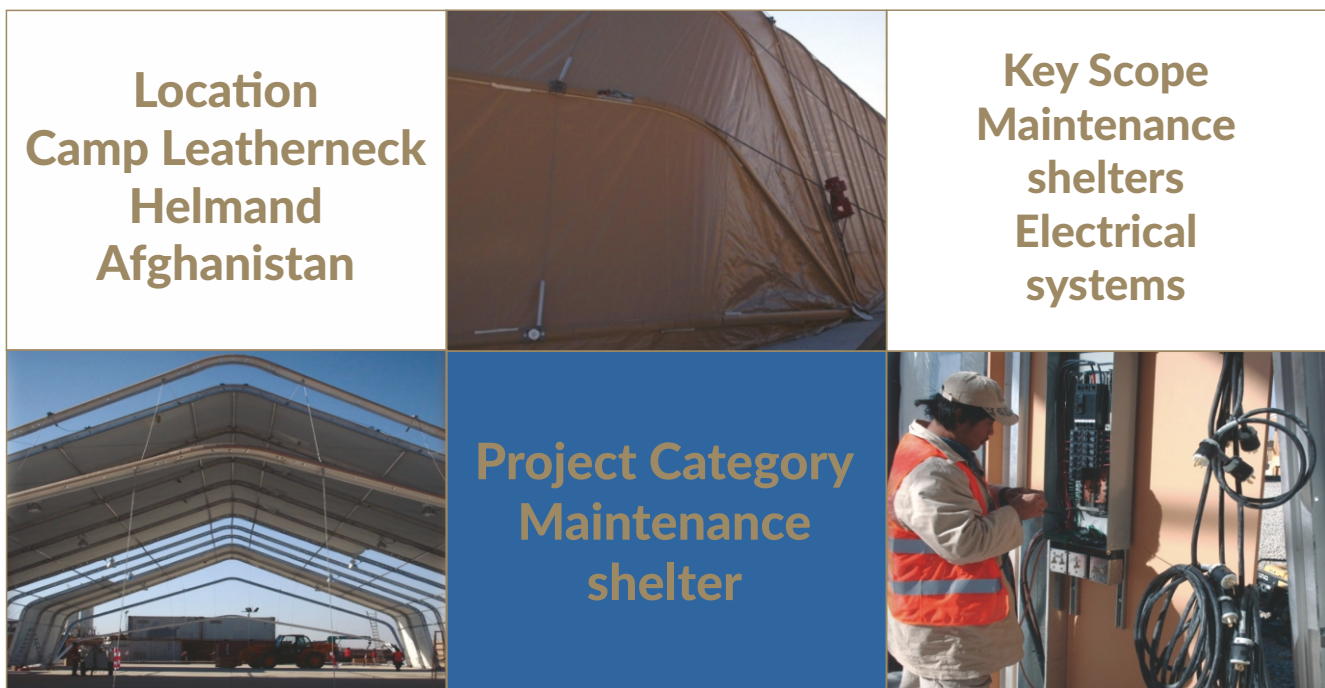

Scope / Description

Construction support for warehouses and maintenance buildings including insulation, doors, windows, structural calculations and engineering verification for specialized facilities.

Construction of LAMS and Maintenance Shelters

Large Aircraft Maintenance Shelter Project

- Maintenance shelters
- Mechanical systems
- Electrical systems
- Installation works

Client / Owner
RCC Leatherneck

Scope / Description

Installation of large maintenance shelters for use with military vehicles and equipment, including electrical and mechanical systems and connection to shop power.

Construction of Accelerated Forward Operating Base KANDAK at Tombstone

Forward Operating Base Construction Project

- FOB construction
- Site facilities
- Civil works
- Military support

Location
Tombstone
Leatherneck
Afghanistan

Key Scope
FOB Construction
Civil Works

Project Category
Forward
Operating Base

Client / Owner
AFCEE

Scope / Description

Construction of a forward operating base for Afghan National Army personnel, including construction works, civil works, vertical construction and supporting site facilities.

Iraqi Special Operations Force Command Construction

Special Operations Command Centre Project

- Command Centre
- Operational Facilities
- Civil works
- Specialized buildings

Location
Al ASAD
Air Base
Iraq

Key Scope
Command Centre
Civil Works

Project Category
Command
Facilities

Client / Owner
AFCEE

Scope / Description

Construction of ISOF command centre facilities including vertical construction and civil works to deliver specialist usable space for operational command requirements.

Baghdad Police College

Police Academy K-Span Facilities Project

- Training facilities
- Installation works
- K-Span structures
- Academy support

Location
Baghdad
Iraq

Key Scope
Training Facilities
K-Span Structures

Project Category
Training
Facilities

Client / Owner
LAGUNA / AFCEE

Scope / Description

Design and build of K-Span structures for the Baghdad Police College Academy including installationsupport, facilities works and final handover for training use.

Al Nuckaib Military Compound

Military Compound Structural Facilities Project

- Military compound
- Civil works
- K-Span structures
- Facility delivery

Location
Al Anbar
Iraq

Key Scope
Military compound
K-Span structures

Project Category
Military
Compound

Client / Owner
Tetra Tech / AFCEE

Scope / Description

Design and build of K-Span structures for military installations including exterior and interior works, installation of doors and windows and supporting civil works.

H3 Military Compound

Military Compound K-Span Facilities Project

- Military Facilities
- Military Compound
- K-Span Buildings
- Compound Construction

Location
Al Anbar
Iraq

Key Scope
Military Facilities
K-Span Buildings

Project Category
Military
Compound

Client / Owner
MJV / AFCEE

Scope / Description

Design and build of K-Span structures for new military compound facilities, including building works, doors and windows, and supporting installation requirements.

Al Qaem Round Road Construction

Road Construction & Infrastructure Project

- Road construction
- Asphalt works
- Earthworks
- Civil infrastructure

Location
Al Qaem
Iraq

Key Scope
Road Construction
Earthworks

Project Category
Road
Construction

Client / Owner
Al Anbar Governorate

Scope / Description

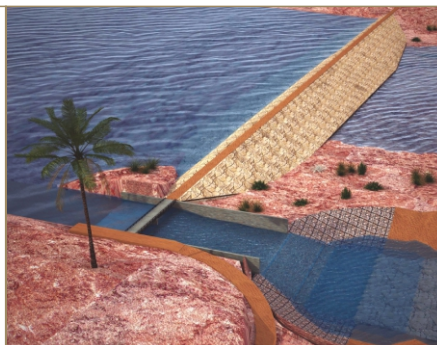

Construction of a round road within Al Qaem including excavation, leveling, base and asphalt works and related civil construction activities for local infrastructure access.

Al Masad Dam Construction

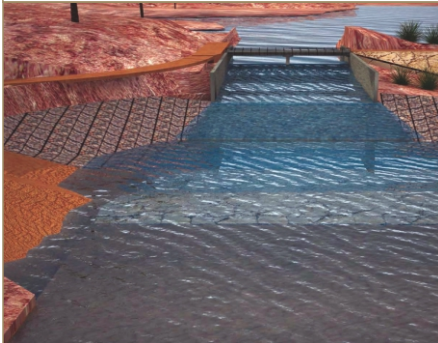

Water Resources & Dam Infrastructure Project

- Dam works
- Civil works
- Water resources
- Mechanical works

Location
Al Qaem
Iraq

Key Scope
Dam works
Water resources

Project Category
Dam
Construction

Client / Owner
Ministry of Water Resources

Scope / Description

Construction of dam-related works including geotechnical survey and civil/mechanical works to support water resources infrastructure and flood-control requirements.

Marshalling Yard

Logistics Yard & Site Support Project

- Logistics yard
- Security gates
- Site preparation
- Camp support

Location
Camp Leatherneck
Helmand
Afghanistan

Key Scope
Logistics yard
Site preparation

Project Category
Logistics
Yard

Client / Owner
RCC Leatherneck

Scope / Description

Supply and installation of sub-base areas and supports for materials staging, security gates and personnel/guard facilities for camp logistics requirements.

Al Qaem Border Road Paving

Border Road Paving & Access Infrastructure Project

- Road paving
- Asphalt works
- Drainage
- Border access

Location
Al Qaem
Al Anbar
Iraq

Key Scope
Road paving
Drainage

Project Category
Road
Paving

Client / Owner
USACE

Scope / Description

Construction and paving of border roads, including excavation, soil works, drainage, asphalt placement and protective roadway works required for border access operations.

Port Dredging

Marine Dredging & Port Infrastructure Project

- Port works
- Marine infrastructure
- Dredging
- Stabilization

Location
Umm Qasr Port
Basra
Iraq

Project Category
Port
Infrastructure

Key Scope
Port works
Dredging

Client / Owner
GCPI Lot A Project

Scope / Description

Construction and paving of border roads, including excavation, soil works, drainage, asphalt placement and protective roadway works required for border access operations.

Abu Ghraib - Water Treatment Plant

Water Treatment & Utility Infrastructure Project

- Water treatment
- Chlorination
- Filtration
- Civil works

Location
Baghdad
Iraq

Key Scope
Water Treatment
Filtration

Project Category
Water treatment
plant

Client / Owner
Baghdad Governorate

Scope / Description

Construction of a water treatment plant to serve the Abu Ghraib area, including water intake, treatment systems, filtration, dosing, chlorination and associated civil works.

Camp Hero Erection of K-Span

K-Span Camp Facility Construction Project

- K-Span erection
- Camp facilities
- Doors & windows
- Accelerated delivery

Location
Camp Hero
Kandahar
Afghanistan

Key Scope
K-Span erection
Doors & windows

Project Category
K-Span
Construction

Client / Owner
ECC

Scope / Description

Construction of K-Span buildings including windows, doors and support systems for camp facilities under an accelerated delivery schedule.

K-Span Steel - Supply and Install

Steel Arch Building Supply & Installation Project

- K-Span steel
- Installation
- Fabrication
- Schedule control

Location
Shindand
Afghanistan

Key Scope
K-Span steel
Fabrication

Project Category
K-Span
Steel Buildings

Client / Owner
EMROOZ

Scope / Description

Supply and installation of K-Span steel arch buildings including materials, shop fabrication, installation planning and schedule-controlled execution.

PX K-Span Project

K-Span Retail Facility Project

- PX facility
- Concrete works
- K-Span works
- MEP systems

Location
Camp Leatherneck
Afghanistan

Key Scope
PX facility
K-Span works

Project Category
K-Span
Building

Client / Owner
RCC Leatherneck

Scope / Description

Construction of a K-Span PX facility including drainage, concrete works, structural construction and electrical/mechanical system provisions.

Supply and Install K-Span and Concrete Structures for HRDC

K-Span & Concrete Facilities Project

- K-Span facilities
- Mechanical works
- Concrete structures
- Facility delivery

Client / Owner
Supreme Fuels

Scope / Description

Supply and installation of K-Span facilities and concrete structures, including mechanical specification compliance and provision for operational facility use.

Supply and Install 3 Large K-Span Facilities For AMC Camp Dwyer

Aircraft Maintenance Camp Facilities Project

- Large K-Span
- Concrete works
- Drainage
- Mechanical systems

Location
Camp Dwyer
Afghanistan

Key Scope
Large K-Span
Drainage

Project Category
Large K-Span
Facilities

Client / Owner
RCC Dwyer

Scope / Description

Supply and installation of large K-Span facilities for AMC, including drainage, concrete works, insulated buildings and mechanical systems.

Construction of 4 K-Span Buildings for the AMC

K-Span Maintenance Facility Buildings Project

- Maintenance buildings
- Roll-up doors
- Insulation
- MEP systems

Client / Owner
RCC Leatherneck

Scope / Description

Design and construction of four K-Span maintenance facility buildings including concrete works, insulation, roll-up doors and electrical/mechanical systems.

DELARAM Officers - Offices and Accommodation

Offices & Accommodation Facility Project

- Offices
- Prefabricated units
- Accommodation
- Site works

Location
Camp Delaram
Helmand
Afghanistan

Key Scope
Offices
Accommodation

Project Category
Office and
Accommodation
Facilities

Client / Owner
USACE

Scope / Description

Supply and installation of pre-fabricated buildings for officer accommodation, housing, laundry and latrine facilities, including site works and access provisions.

Man Camp & Facility Construction Basra

Oil & Gas Man Camp Support Project

- Man camp
- Maintenance facilities
- Oil & gas support
- Warehousing

Location
Basra
Iraq

Key Scope
Man camp
Oil & gas support

Project Category
Man camp
oil & gas support

Client / Owner
Al Saraf

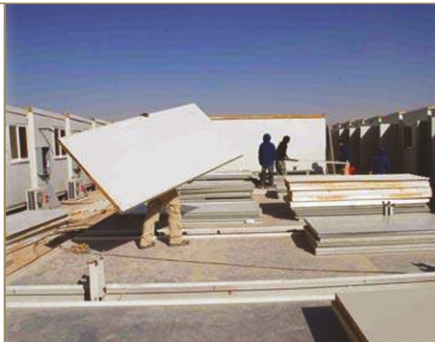

Scope / Description

Construction of a complete man-camp facility in support of the oil and gas industry in South Iraq, including large maintenance and warehouse facilities.

Relocatable Buildings & Electrical Works Project

- Relocatable units
- HVAC
- Electrical installation
- Utilities

Location
Camp Leatherneck
Helmand
Afghanistan

Key Scope
Relocatable units
Electrical
Installation

Project Category
Relocatable
buildings

Client / Owner
RCC Leatherneck

Scope / Description

Supply and installation of relocatable buildings to accommodate military personnel, including HVAC, electrical fit-out and utility integration requirements.

Al Hamedya School Construction

Primary School Construction Project

- School construction
- Civil works
- Classrooms
- Mechanical works

Client / Owner
Baghdad Governorate

Scope / Description

Construction of a 12-classroom primary school including special K-Span buildings, administration and ablution areas, and associated civil and mechanical works.

Topographical and Geotechnical Survey

Survey & Site Investigation Project

- Topographic survey
- Soil testing
- Geotechnical works
- Pipeline route survey

Location
AKKAS Gas Field
Iraq

Key Scope
Topographic survey
Geotechnical works

Project Category
Survey
geotechnical

Client / Owner
KOGAS

Scope / Description

Topographical and geotechnical survey works for the AKKAS gas field and oil pipeline route, including boreholes, soil testing, hydrometeorological review and GPS topographical survey.

Crude Oil Expansion

Crude Oil Expansion & Site Development Project

- Crude oil expansion
- Infrastructure
- Earthworks
- Stabilization

Location
Khor Umayya
Basra
Iraq

Key Scope
Crude Oil
Expansion
Earthworks

Project Category
Crude oil
Marine support

Client / Owner
Van Oord

Scope / Description

Earthworks and infrastructure support for crude oil expansion operations, including material movement, excavation and stabilization works for oil-related facilities.

Power Plant Pipeline

Pipeline Installation & Commissioning Project

- Pipeline works
- Welding
- Fuel supply
- Commissioning

Location
Al Mussayab
Iraq

Project Category
Power plant
pipeline

Key Scope
Pipeline works
Fuel supply

Client / Owner
Iraq Ministry of Oil

Scope / Description

Installation and commissioning of a fuel supply pipeline to a power station, including crossings, pipe installation, welding and operational support works.

AKKAS Fuel Tank Fabrication for Gas Turbine

Fuel Storage Tanks for Power Plant Support

- Fuel tanks
- Civil foundations
- Fabrication
- Power plant support

Location
AKKAS
Al Anbar
Iraq

Key Scope
Fuel tanks
Fabrication

Project Category
Fuel tanks
power support

Client / Owner
LANCO

Scope / Description

Construction of vertical cylindrical steel fuel tanks for gas turbine support, including foundation works, fabrication, installation and pre-installation irrigation/support works.

Elevated Water Tanks

Elevated Storage Tanks Project

- School construction
- Water storage
- Steel structures
- Utility support

Location
Al Rumadi
Iraq

Key Scope
Water tanks
Utility
Infrastructure

Project Category
Elevated tanks
Steel structures

Client / Owner
Iraqi MOD

Scope / Description

Design and construction of steel elevated water tank structures to support water storage and distribution requirements at the surrounding region.

Engineering Supervision of Shipbuilding

Shipbuilding Supervision & Marine Engineering Project

- Shipbuilding
- Marine works
- Steel Engineering supervision
- Project coordination

Location Basra Iraq	Key Scope Shipbuilding Supervision	
		Project Category Shipbuilding Engineering Supervision

Client / Owner
AVIC

Scope / Description

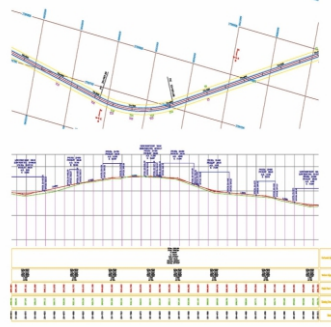

Engineering and supervision support for the construction of tug boats and marine vessels for the General Company of Ports of Iraq in collaboration with international partners.

Survey and Border Road Design and Supervision

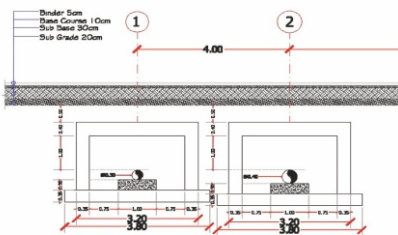

Road Design & Supervision Project

- Road design
- Construction supervision
- Survey works
- Client support

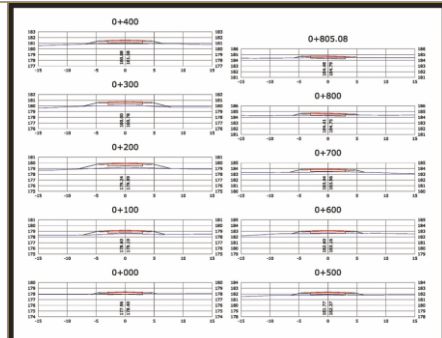

**Location
Western
Iraq**

**Key Scope
Road Design
Survey Works**

**Project Category
Survey
Road Design**

**Client / Owner
USACE**

Scope / Description

Survey and design support for a new border road, including contractor supervision, engineering review and implementation support on behalf of the client.
